Company Overview

OCS Capital is a technology and infrastructure company headquartered in Pretoria, South Africa.

Operating a state-of-the-art Data Processing Center (DPC) within a protected High Technology Park, we deliver enterprise-grade IT infrastructure to clients across Africa and internationally.

Our expertise covers virtualization, network management, and infrastructure development serving government, telecoms, banking, and e-commerce sectors.

Availability

99.5%

Our systems ensure high uptime with continuous monitoring and minimal downtime

Fault tolerance

99.9%

Our infrastructure is designed to automatically handle failures and maintain uninterrupted service.

Our Solutions

It meets the requirements of international quality standards and guarantees trouble-free operation of users' information systems with specified levels of availability, reliability, security and manageability.

COLOCATION

Place your own equipment in dedicated server rack spaces (1U) or full cabinets. Physical security and 24/7 access guaranteed.

DEDICATED SERVERS

Host projects on dedicated physical hardware for full resource exclusivity, maximum performance, and complete isolation.

VIRTUAL SERVERS (VPS)

Scalable virtual servers tailored to your specifications flexible, cost-efficient, cloud-like computing on demand.

01

Personalized approach

We study each client's tasks and requirements individually to offer the best combination of resources and cost.

02

Discounts for long-term cooperation

Discounts for service orders from 1 year old.

03

Comprehensive safety system

Protection against hardware and software failures, power failures, unauthorized access, hacker and virus attacks.

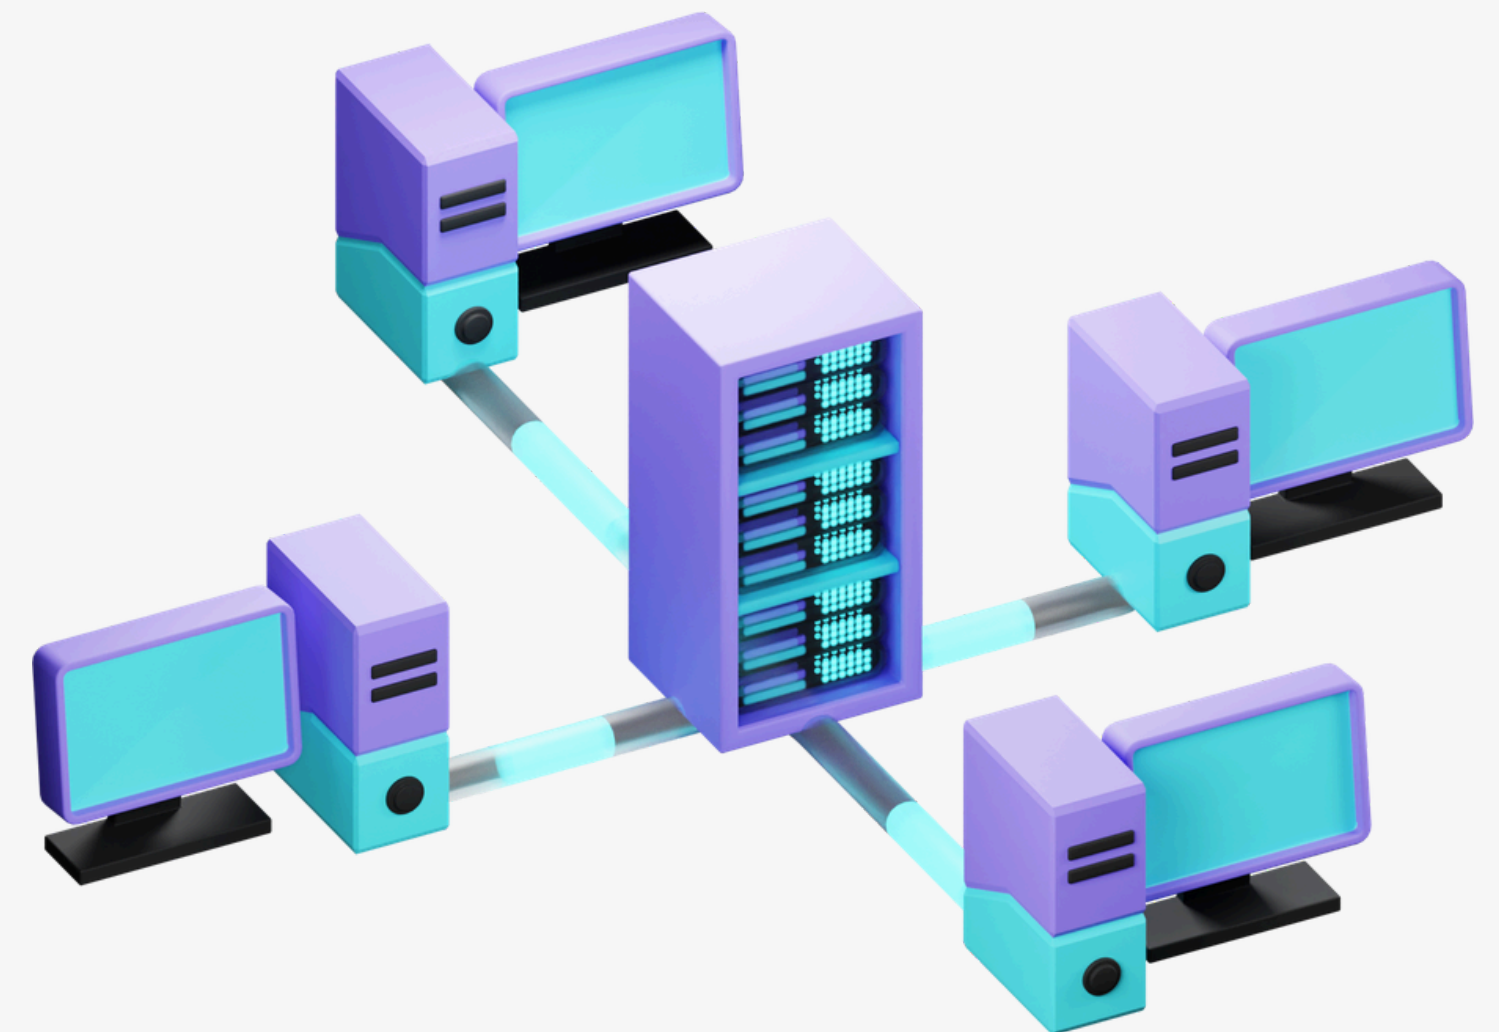

04

Convenient infrastructure and relocation assistance

Convenient parking and places for the client's technical staff to work. If necessary, we assist in relocation and placement of computing facilities in our data center.

Advantages of Data Centers

Data centers offer secure, reliable, and high-performance environments for managing critical business data and applications. With advanced infrastructure, redundancy, and 24/7 monitoring, they ensure minimal downtime, strong data protection, and seamless scalability to support business growth.

INDUSTRIES WE SERVE

We empower industries with secure, high-performance IT infrastructure built for reliability and growth. Our solutions are designed to meet evolving demands while ensuring efficiency and business continuity.

State apparatus

Telecoms

Banking and Finance

Electronic commerce

Secure, compliant data infrastructure for government bodies, public sector agencies, and national institutions.

High-bandwidth colocation and hosting for telecoms operators, ISPs, and network infrastructure providers.

Compliant, hardened hosting for financial institutions, banks, payment processors, and fintech companies.

Reliable, low-latency infrastructure for online retail platforms, marketplaces, and digital commerce.

Building the Bright Future Together

Driving the future with resilient and
intelligent technology
